

QUANTEAM PORTUGAL ACCELERATES ITS 2026 STRATEGY WITH GROWTH AMBITION AND TECHNOLOGICAL LEADERSHIP

Porto, January 2026 - Plan foresees expansion to 150 consultants and €7 million in revenue, consolidating Portugal as a technical and functional competence center within the group.

Quanteam Portugal enters 2026 with a reinforced strategic commitment, backed by a strengthened investment strategy and a growth plan aimed at consolidating Portugal as a technical and functional competence center. The company begins the year with around 100 consultants and has set two main objectives for 2026: expanding the team to 150 consultants and reaching €7 million in revenue.

In 2025, Quanteam Portugal achieved €3.5 million in revenue and strengthened its position as a reference partner in projects across banking, financial markets, technology, data, and cybersecurity. This performance reinforces Portugal's strategic role within Quanteam and the RAINBOW PARTNERS group, positioning the country as a key hub for growth and specialization.

Quanteam is well known for its unique blend of deep financial expertise and robust technological implementation capabilities. This dual competency enables the firm not only to provide strategic advisory services, but also to design, develop, and align technological solutions with the concrete needs of its national and international clients.

«Our competitive advantage lies in the integrated combination of financial and technological expertise. In Portugal, we are intensifying this investment by strengthening our teams and capabilities, allowing us to deliver value in a consistent and measurable way.» adds Guillaume Favrot, Managing Partner at QUANTEAM Portugal.

For 2026, the company plans to reinforce its teams, with a focus on technical and functional profiles, deepen expertise in technologies applied to the financial sector, and strengthen strategic technological partnerships. This integrated approach differentiates Quanteam from traditional consulting firms, ensuring greater delivery capacity in complex financial and technological projects. The expansion of the Portuguese operation is fully aligned with Quanteam's global strategy within the Rainbow Partners Group.

«Strengthening our operation in Portugal allows us to combine local proximity with the resources of an international network, ensuring scale, specialization, and reliability in critical financial and technological projects.» emphasizes Francisco Sousa Pinto, Managing Partner at QUANTEAM Portugal.

Part of an international consulting firm, pure player in banking and finance sectors, with a presence in 13 offices and more than 1,000 professionals, Quanteam Portugal continues to establish itself as a key partner in the market, consolidating the country's position as a strategic hub within the organization.

ABOUT QUANTEAM

Founding entity of the Rainbow Partners group, QUANTEAM is a consulting firm specializing in Banking and Finance, with a presence in France and internationally. With its dual expertise in Business and IT, QUANTEAM supports its major clients (corporate and investment banks, asset management firms, private and retail banks, securities custodians, etc.) across the entire Front-to-Back chain, helping them evolve their business operations and execute their transformation projects.

Driven by four strong human values—proximity, teamwork, diversity, and excellence—QUANTEAM's 1000 consultants (worldwide) are organized into five areas of expertise: Quantitative Analysis, Risk, Compliance & Regulatory, Operations & Finance, Transformation & Organization, and Information Systems. As a committed company, QUANTEAM actively contributes to sustainable development (Ecovadis Silver), promotes diversity (Gender Equality Index: 82%), and fosters workplace well-being (Best Workplace Experience).

In 2025, QUANTEAM achieved a revenue of 120M€
